Admin Dashboard Application

The Admin Dashboard is a centralized platform for managing various aspects of a service or system, such as user accounts, content, and performance metrics. It allows administrators to monitor activity, configure settings, and ensure smooth operation of the platform. The dashboard is designed to provide quick access to essential tools and information for effective system management.

Fullstack Online Shop

An online shop project is a web-based platform that allows users to browse, purchase, and manage products, offering features like product search, shopping cart, secure payment processing, and order tracking to create a seamless e-commerce experience.
